Special Price List

For

County Agents

and

Vocational

Agriculture Teachers

From

Cumberland
Valley Nurseries

INCORPORATED

McMinnville -- Tennessee

Realizing the increasing interest shown by County Agents and other officials in like positions, serving directly the farmer and home owner, we offer this special list as an aid to such officials in securing for their clients nursery stock of standard quality at prices that will make such stock available in any quantity, small or large.

Our reputation is such that prospective customers will be glad to buy our products, and especially so when it is considered that the prices shown herein represent only a small profit over the cost of production and handling.

For convenience, the different items are priced, each, per 10, and per 100, and, in some instances, per 1000. These prices include free packing, which is in itself, a good inducement.

Stock is priced f. o. b. nursery, and postage, express, or freight charges are to be paid by customer. If order is to be sent by mail, a sufficient amount should be included to cover postage. If too much is sent for postage, the excess will be refunded to customer.

Terms are cash with order. If wanted to be sent C. O. D., a part of purchase price should accompany order, as evidence that order is placed in good faith.

All stock will be carefully handled, and well packed, and we guarantee safe arrival of purchases.

We grow a good assortment of varieties, and will, therefore, be able to furnish most any stock ordered true to name. Should we run short of any variety ordered, we will send the variety nearest like it.

Club orders amounting to \$50.00 or more, or individual orders of like amount, will get a straight discount of five per cent from list prices.

We await with interest the opportunity to serve you.

CUMBERLAND VALLEY NURSERIES, Inc.

FRUITS, ETC.

We can furnish most of the varieties in fruit trees and berry plants that are usually grown in this section. Should we be out of any certain variety ordered, we will send in its place the one we have that is most nearly like the variety ordered.

APPLE—Whips.

		Each	Per 10	Per 100
2 to 3 feet.....		.20	\$1.75	\$15.00
3 to 4 feet.....		.25	2.25	20.00
4 to 5 feet.....		.30	2.75	25.00

APPLE—Two year branched

3 to 4 feet.....	.35	\$3.25	\$30.00
4 to 5 feet.....	.40	3.75	35.00
5 to 6 feet.....	.45	4.25	40.00

Varieties:

Early or Summer Apples:

Yellow Transparent. Earliest variety of apple. Fruits pale yellow, slightly acid, and markets in good condition. Trees bear young.

Duchess. A late summer variety which thrives anywhere and bears well flavored fruit. An all purpose apple.

Maiden Blush. A late summer apple. Possibly the best commercial variety for cooking in its season.

Early Harvest. One of the earliest summer apples. Trees very vigorous and productive. Fruit tender with yellow skin. Good for eating and cooking.

Red June. An early summer apple, producing medium sized red fruit of distinctive flavor. No home orchard is complete without it.

Hackworth. A southern variety of distinctive merit. Should have a place in all family orchards in Dixie.

Late Fall Apples:

Grimes Golden. A favorite yellow apple. Fruit medium, uniform, yellow. Flesh tender and crisp, slightly acid. Stores well.

Kinnard's Choice. Originated in Tennessee. One of the best all purpose red apples. Similar in color to Winesap, but ripens earlier. Appreciated wherever known.

Northern Spy. A hardy healthy apple that is very productive and stores well. Brings top market price.

Northwestern Greening. A fall apple in the South, but ripening later in northern localities where it is hardy and very productive. Fruit pale, waxy yellow, sometimes faintly blushed.

Red Delicious. A late fall variety that is well known commercially. Trees very vigorous and bears larger and better fruits with age. Fruit oblong, nearly covered with dark red. Flesh firm, juicy and very distinct aromatic flavor.

Tolman Sweet. The leading sweet apple. Trees hardy, long-lived and bear early. Fruit pale yellow, sometimes blushed. Flesh firm, white and sweet.

Wealthy. Another fall apple in the South, which is hardy in the North. Fruit of good appearance, shaded to dark red. Flesh tender sub-acid. Especially adapted to sandy soils.

Yellow Delicious. An all-purpose apple with almost every good quality. Trees vigorous and productive. Fruit uniform in size, coloring to a good yellow color. Flavor very distinctive and pleasing.

York Imperial. A late fall or early winter variety, planted largely in the Virginias and adjoining states. Fruits keep and ship exceptionally well.

Winter Apples:

Baldwin. Probably the most extensively grown of any winter apple in the Eastern states. Fruit uniform in shape, yellow blushed and mottled with red. Flesh crisp, tender and juicy.

Cortland. Very similar to McIntosh, but if possible an improvement. Fruit bright deep red in color. Flesh snow white, firm, crisp and tender.

Jonathan. Everybody places this variety among the best in both appearance and quality. Medium sized fruits with brilliant red skins. Flesh nearly white, crisp and tender with a distinctly pleasant aroma.

Mammoth Black Twig. A seedling of Winesap, growing more vigorously. Bears large fruits of good quality.

Rome Beauty. An excellent market variety. Fruit uniform and very attractive. Planted largely in commercial orchards, but fits well into the home orchard.

Red Rome Beauty. Quite an improvement over the Rome Beauty as far as color is concerned. Quality practically the same.

Stayman Winesap. Larger than the common Winesap. Fruit dark, rich red, indistinctly striped. Keeps well and can be used in every way. One of the best.

Winesap. Thrives everywhere planted. Fruit excellent. Keeps well and is good commercially.

Winter Banana. Trees very hardy, vigorous and fruitful. Fruit clear, pale yellow, with a delicate blush. Flavor rich, mixture of sweet and sour.

Yates. Very popular in the South, especially in Georgia. A heavy bearer and good keeper. Fruit will often stay on trees until near Christmas if not picked.

Crab Apples:

Transcendent. An early ripening variety, ripening in August. Color yellow, overspread with bright red. Flesh very crisp and tender.

Whitney. Ripens in late August. Has all the good qualities that an early Crab Apple can have. Very tender and juicy. Not excessively acid when ripe.

PEAR—Whips.

	Each	Per 10	Per 100
2 to 3 feet.....	.25	\$2.25	\$20.00
3 to 4 feet.....	.30	2.75	25.00
4 to 5 feet.....	.35	3.25	30.00

PEAR TREES—Two year branched.

3 to 4 feet.....	.40	3.75	35.00
4 to 5 feet.....	.45	4.25	40.00
5 to 6 feet.....	.50	4.75	45.00

Varieties:

Bartlett. Grown profitably in every pear growing section in America. Trees vigorous and bear young. Fruits large and long with clear yellow color when mature. Flesh fine grained and juicy.

Garber. An earlier pear than Keiffer. Hardy north and south. A very vigorous grower, producing fruits suitable for culinary purposes.

Keiffer. Grown largely for culinary purposes. Grows to large size. Fruit long and heavy. Flesh coarse and not so sweet. Largely planted for canning.

Seckel. Very vigorous and productive. Fruits reddish-brown of medium size. One of the best all purpose pears.

PLUM.

	Each	Per 10	Per 100
2 to 3 feet.....	.25	\$2.25	\$20.00
3 to 4 feet.....	.30	2.75	25.00
4 to 5 feet.....	.35	3.25	30.00

Varieties:

Abundance. Best known Japanese variety. Adapted to a wide variety of soils. Excellent in home orchard. Fruit dark mottled red. Very sweet and juicy.

Burbank. Trees not so vigorous as Abundance, but fruits keep better and ship in good condition when picked a few days before entirely ripe. Fruits dark yellow, mottled red. Flesh yellow, firm and tender.

Red June. Trees large and productive and remarkably free from disease. Color red with small russet dots. Flesh yellow, meaty and sweet, except near the seed. Excellent variety.

Shropshire. Best known Damson. Very vigorous. Hardy and productive, often overlaid with fruit. Color blue-black. Flesh golden yellow. Good variety if you are planting one tree or one thousand trees.

Wickson. One of the largest plums. Fruit red over yellow, flesh of amber yellow which is juicy, slightly coarse, firm and sweet. A very showy variety.

CHERRY.

2 to 3 feet.....	.40	\$ 3.50	\$30.00
3 to 4 feet.....	.45	4.00	35.00
4 to 5 feet.....	.50	4.50	40.00

Varieties:

Black Tartarian (Sweet). A widely planted sweet cherry. Adapts itself to many different soils and climates. Fruits ripen early. Purplish red flesh that is sweet and juicy.

Dyehouse (Sour). Ripens a week earlier than Early Richmond. Fruits slightly smaller, color dark red. Flesh yellowish white with tart juice.

Early Richmond (Sour). The leading early sour cherry. Trees vigorous everywhere planted. Fruits dark red. Flesh pale yellow, tender and melting.

May Duke (Sour). This is one of the oldest and most widely planted varieties. Fruit early, color light to red. Flesh dark red with pleasing flavor.

Montmorency (Sour). The most popular sour cherry grown in America. It is surpassed by no other sour cherry in vigor and health. Fruit light to dark red. Flesh pale yellow, tinged with red; very juicy.

Gov. Wood (Sweet). A wonderful sweet cherry for home use. Trees bear early. Fruit large, yellowish-white tinted with crimson. Flesh tender, sweet and juicy.

APRICOT.

	Each	Per 10	Per 100
2 to 3 feet.....	.25	\$2.25	\$20.00
3 to 4 feet.....	.30	2.75	25.00

Varieties:

Early Golden. An early ripening variety of medium size. Skin smooth, pale orange color. Flesh yellow. Juicy and sweet, with good flavor.

Moorpark. Trees very large. Fruits of largest size and excellent in both appearance and quality. Color deep orange with distinct blush on side next to the sun. Flesh very firm, juicy and rich.

Royal. Tree large and vigorous. Regular in bearing with large crops. Fruit large yellow tinged with red. Flesh firm and juicy. Stone free.

QUINCE.

	Each	Per 10	Per 100
2 to 3 feet.....	.25	\$2.25	\$20.00
3 to 4 feet.....	.30	2.75	25.00

Varieties:

Champion. Tree vigorous and very productive. Fruit large. Flesh pale yellow, very firm and juicy. A good standard variety.

Orange. An early ripening variety, more adapted to the North. Color golden yellow. Flesh pale yellow becoming dark red when cooked. Quality good.

GRAPES.

1 year10	\$.90	\$ 8.00
2 year15	1.25	10.00

Varieties:

Concord. The most widely known grape in America. Very fruitful every year. Clusters uniform. Fruit black, firm and juicy.

Delaware. Next to Concord in popularity. Bears abundant crops of spicy red fruit. Very rot-resistant.

Moore's Early. Almost identical with Concord in fruiting habits and quality, except earlier to ripen.

Niagara. This is the leading green grape. Vines vigorous and productive. Not as hardy as Concord, but withstands sub-zero temperature. Bunch and berries slightly larger than Concord. Very tender and juicy.

Worden. A week to ten days earlier than Concord. Fruit of very high quality, large purplish black. Flesh green, very sweet and mild.

PEACH.

	Each	Per 10	Per 100
12 to 18 inch.....	.08	\$.75	\$ 7.00
18 to 24 inch.....	.10	.90	8.00
2 to 3 feet.....	.15	1.25	10.00
3 to 4 feet.....	.20	1.75	15.00
4 to 5 feet.....	.25	2.25	20.00

Varieties:

Belle of Georgia. Fast growing, vigorous tree bearing large, creamy-white fruits, with crimson cheek. Flesh white, tinted red at pit. Semi-eling. Mid-season, July.

Carman. A very conspicuous, white peach, doing equally as well north or south. Fruit medium-sized popular shipping variety. Earlier than Belle of Georgia. Early July variety.

Champion. The standard white freestone. Trees very productive. Fruit very attractive, as well as good flavor. Late July.

Early Rose. An early ripening variety, often called second early. White semi-freestone peach. Good blush and excellent flavor for an early peach. Ripens mid-June.

Early Crawford. Large, yellow variety of rich flavor. Tender flesh and very juicy. Ripens along with Belle of Georgia.

Early Elberta. Ripens about ten days before Elberta. More roundish and slightly sweeter.

Elberta. The standard yellow peach. Grows in every peach growing state. Gives good crops of well-formed fruit.

Golden Jubilee. An early, yellow, freestone peach, ripening from three to four weeks before Elberta. Very highly praised wherever grown, both as a market and home variety.

Hiley. A variety similar to Belle of Georgia, but ripens at last two weeks earlier. White with red cheek. White, juicy flesh. Good shipper.

J. H. Hale. A large, deep red peach with yellow flesh. Has practically no fuzz, and the strong flavor characteristic of Elberta is absent. Ripens in mid-July.

Late Elberta. Almost identical with Elberta, except ripens about ten days later. A good follow-up for Elberta.

Mayflower. Ripens earlier than any other peach. Trees hardy, and productive. Fruit medium, entirely covered with red. Ripens before June 1 in this section.

Red Bird. One of the best early peaches. Bright red color, with good flavor. Good commercial variety. Ripens in early June.

Rochester. One of the hardiest varieties. Largely grown in the Eastern states, but has proven a good variety almost everywhere planted. Fruit long pointed. Flesh yellow, stained red near seed.

Heath Cling. One of the old favorites. A late, white clingstone peach that keeps well when removed from tree. Excellent for cooking whole as stone gives no bad flavor. Ripens in September.

Frummel. A valuable peach where a late variety is wanted. Color light yellow, blushed with carmine. Flesh yellow, fine texture, juicy and somewhat acid.

BLACK RASPBERRY.

Each	Per 10	Per 100
\$.04	\$.30	\$ 2.50

Variety:

Cumberland. Very hardy and productive. A tall upright grower. Fruit large, glossy black. Flesh firm, juicy and sweet. Seeds small.

RED RASPBERRY.

Each	Per 10	Per 100
\$.06	\$.50	\$ 3.50

Chief. The most dependable early red raspberry. Considered by some superior to Latham. Fruit almost equal in size and quality to Latham.

Latham. One of the largest and most prolific reds. Very large, juicy fruit of excellent quality.

St. Regis. Ever-bearing variety. Gives crops of fruit throughout the summer. Fruit medium size, highly flavored.

Van Fleet. A thrifty grower of merit. Fruit large red and very showy.

BLACKBERRY.

\$.05	\$.40	\$ 3.00
--------	--------	---------

Varieties:

Early Harvest. One of the earliest varieties, very prolific. Good market variety.

Eldorado. Very vigorous and hardy. Berries very large and ripen together. Very sweet.

DEWBERRY.

	\$.06	\$.50	\$ 3.50
--	--------	--------	---------

Varieties:

Austin. A most productive market variety, bearing enormous crops of large berries at least a week before other varieties.

Lucretia. A very hardy variety, producing berries of extra size and quality. Very sweet and luscious.

GOOSEBERRY.

	Each	Per 10	Per 100
	\$.15	\$1.25	\$11.00

Varieties:

Downing. Very vigorous and productive. Fruit light green with distinctive veins. Juicy with fine flavor.

Houghton. Abundant bearer. Vigorous grower. Fruits dark red, sweet and juicy.

CURRENTS.

	Each	Per 10	Per 100
	\$.15	\$1.25	\$11.00

London Market. Plants tall, upright and vigorous. Berries dark red.

Prince Albert. Vigorous, upright grower. Fruit very late. Sour and very highly flavored.

Wilder. A very popular commercial variety. Fruit grows in clusters. Red colored and exceptionally showy, as well as being of the highest quality.

STRAWBERRIES.

	Per 10	Per 100	Per 1000
Single crop	\$.15	\$.60	\$ 4.50
Everbearing30	1.75	7.00

Varieties. Single Crop.

Arcma. A mid-season variety that is very resistant to frost damage. Berries large, red clear through.

Blakemore. A good early berry that is fast replacing some of the early varieties. Fruit averages larger than other early varieties, and ships well.

Gandy. Last to ripen, and a fine berry.

Klondike. The standard shipping variety. Heavy bearer of firm red berries that ship in good condition.

Everbearing varieties: Progressive, Mastodon and Gem.

FIGS.

	Each	Per 10	Per 100
18 to 24 inches.....	\$.25	\$2.00	
2 to 3 feet.....	.35	3.00	

Varieties:

Celeste. Medium size fruit with purplish color. Hardest variety.

Brunswick. Very large fruit. Color purple. Productive and hardy.

10 COUNTY AGENTS SPECIAL PRICE LIST

Brown Turkey. Medium to large fruit shaped like a pear. Skin coppery brown, flesh white except has pink tinge near seed bed. Ripens mid-season and is one of the hardiest varieties.
